Our USP's

14 years of experience

Founded in Leipzig in 2004, nextbike has grown to become one of the world's leading manufacturers and operators of bike share schemes.

Cutting-edge technology

Started as a small bike sharing provider, nextbike has developed into a technology-driven company. Today, our bikes and IT infrastructure are state-of-the-art with technologies such as NFC, GPS, RFID, solar energy and mobile payment solutions.

Everything under one roof

nextbike develops and produces everything in-house, from the software to the bikes. This allows us to work quickly, flexibly and cost-effectively.

Tailor-made solutions

All products - from hardware to software - are designed and developed by us and are compatible with each other. This approach enables us to meet individual needs in a cost-efficient way.

Public transport integration

We offer the infrastructure to integrate bike sharing into public transport.

Our bikes and terminals are equipped and compatible with all Smart Card standards. Through tariff integration your customers can benefit from free minutes of usage.
