MetroBus: Bus Rapid Transit (BRT)

MetroBus: Bus Rapid Transit (BRT)

Metrobus is a new, modern public transport service for the greater Bristol area.

Metrobus offers faster, more frequent and more reliable services with direct routes to key destinations. It uses new, modern, environmentally-friendly vehicles with USB sockets and free Wi-Fi. The buses have an extra pair of doors to speed up getting on and off.

It's also a 'buy before you board service' with ticket machines at every stop, for quicker journeys.

MetroBus is part of the West of England's plan to:

- reduce carbon emissions
- support sustainable economic growth
- promote accessibility
- contribute to better safety, security and health
- improve quality of life and create a healthy natural environment

- improvements to rail via MetroWest

MetroBus has been designed to link and connect with existing rail and bus services. It builds on the £80 million investment in the Greater Bristol Bus Network and is part of an integrated approach to travel investment that includes:

- passenger transport improvements (MetroBus and new bus links)
- measures to improve cycling and walking
- traffic and parking management
- improvements to rail via MetroWest
